| RESEARCH INTERESTS  | General relativity (GR), gravitation, and astrophysical phenomena which can elucidate gravity. One major theme is pushing numerical and analytical gravitational-wave (GW) predictions to the precision frontier in advance of next-generation observatories. A second major theme is using GWs to test GR against beyond-GR models, in both theory-independent and theory-dependent models. This involves numerical relativity and renormalization methods applied to specific effective field models for beyond-GR theories. |                                                                                                                                                                                                                                          |

Invited video chat, *Topics in Physics* course,  
Stanford Education Program for Gifted Youth

July 2013

**COMPUTER SKILLS** Expert in MATHEMATICA, C/C++, Python, Bash. Proficient in Javascript. Experience in Haskell, Java, Julia. Expert at \*nix and HPC. Markup languages: L<sup>A</sup>T<sub>E</sub>X, HTML, CSS, Markdown.

**Software**—Most contributions can be found at <https://github.com/duetosymmetry>. Member of the *Simulating eXtreme Spacetimes* (SXS) collaboration, contributor to the Spectral Einstein Code (SpEC). Member of the *Black Hole Perturbation Toolkit*. Author of `qnm` python package (<https://github.com/duetosymmetry/qnm>). Core collaborator on xACT (<http://xact.es>) abstract tensor calculus package for MATHEMATICA. Coauthor of xTERIOR package for exterior differential geometry under xACT. Co-maintainer of community contributions at <http://contrib.xact.es>. Developed [arXiv-keys](#) browser extension/add-on for Chrome/Firefox. Author of [orcidlink](#) and coauthor of [gridpapers](#) packages for L<sup>A</sup>T<sub>E</sub>X.

**PUBLICATION SUMMARY** **h-index** —As of 2024-10-13: 62 (according to Google Scholar), or 55 (according to INSPIRE). Both include collaboration papers.

**Top five cited** —Excluding LIGO/Virgo collaboration papers.

1. Berti, E., (5 authors), **Stein, L. C.**, (46 more authors) (2015) *Testing General Relativity with Present and Future Astrophysical Observations*, [Class. Quantum Grav.](#) **32** 243001 [[arXiv:1501.07274](#)].
2. Barack, L., *et al.* (2019) *Black holes, gravitational waves and fundamental physics: a roadmap*, [Class. Quantum Grav.](#) **36** 143001 [[arXiv:1806.05195](#)].
3. Boyle, M., *et al.* (**LCS** is corresponding author) (2019) *The SXS Collaboration catalog of binary black hole simulations*, [Class. Quantum Grav.](#) **36** 195006 [[arXiv:1904.04831](#)].
4. Varma, V., *et al.* (2019) *Surrogate models for precessing binary black hole simulations with unequal masses*, [Phys. Rev. Research](#) **1**, 033015 [[arXiv:1905.09300](#)].
5. Yunes, N., **Stein, L. C.** (2011), *Nonspinning black holes in alternative theories of gravity*, [Phys. Rev. D](#) **83** 104002 [[arXiv:1101.2921](#)].

**SUBMITTED PUBLICATIONS**

70. Berti, E. *et al.*, (2025) *Black hole spectroscopy: from theory to experiment*, [[arXiv:2505.23895](#)].
69. Scheel, M. (3 authors), **Stein, L. C.**, (54 more authors) (2025) *The SXS Collaboration's third catalog of binary black hole simulations*, [[arXiv:2505.13378](#)].
68. De Amicis, M. (5 authors), **Stein, L. C.**, (13 more authors) (2024) *Late-time tails in nonlinear evolutions of merging black holes*, [[arXiv:2412.06887](#)].

**ACCEPTED PUBLICATIONS**

67. Magaña Zertuche, L., **Stein, L. C.**, *et al.*, (2024) *High-Precision Ringdown Surrogate Model for Non-Precessing Binary Black Holes*, [[arXiv:2408.05300](#)].

**COLLABORATION PUBLICATIONS** From 2008–2012, I was coauthor on 34 refereed LIGO and/or LIGO/Virgo collaboration publications. I only list short author-list publications below.

**REFEREED PUBLICATIONS**

66. Da Re, G., Mitman, K., **Stein, L. C.**, *et al.*, (2025) *Modeling the BMS transformation induced by a binary black hole merger*, [Phys. Rev. D](#) **111** 124019, [[arXiv:2503.09569](#)].
65. Mitman, K., **Stein, L. C.**, *et al.*, (2025) *Length dependence of waveform mismatch: a caveat on waveform accuracy*, [Class. Quantum Grav.](#) **42** 117001, [[arXiv:2502.14025](#)].
64. Field, S. *et al.*, (2025) *GWSurrogate: A Python package for gravitational wave surrogate models*, [J. Open Source Softw.](#), 10(107), 7073, [[arXiv:2504.08839](#)].

## INVITED TALKS

- |                                                                        |                |
|------------------------------------------------------------------------|----------------|
| 53. URI physics department colloquium                                  | November 2024  |
| 52. UNC physics department colloquium                                  | February 2024  |
| 51. UIUC astrophysics seminar                                          | December 2023  |
| 50. Harvard CMSA GR seminar                                            | October 2023   |
| 49. UMass Amherst, Amherst Center for Fundamental Interactions seminar | September 2023 |
| 48. Albert Einstein Institute, “Connecting the Dots” panel discussion  | June 2023      |
| 47. Queen Mary Univ. of London, Gravitational memory workshop          | June 2023      |
| 46. Utah State University, Theoretical Physics Talks,                  | March 2023     |
| 45. Iowa State, Physics and astronomy department colloquium,           | October 2022   |
| 44. UT Austin, Weinberg Institute seminar,                             | October 2022   |
| 43. Vanderbilt, Physics and astronomy department colloquium,           | September 2022 |
| 42. ICERM, Advances in CS Classical and Quantum Gravity,               | May 2022       |
| 41. Flatiron CCA, Ringdown workshop, invited overview talk,            | February 2022  |
| 40. DAMTP (University of Cambridge), HEP/GR colloquium,                | January 2022   |
| 39. SISSA, Current challenges in gravitational physics workshop,       | April 2021     |
| 38. Flatiron CCA, Gravitational wave astronomy group seminar,          | January 2021   |
| 37. University of Birmingham, astrophysics seminar                     | September 2020 |
| 36. Albert Einstein Institute, ACR division seminar                    | July 2020      |
| 35. Black Hole Perturbation Toolkit, Spring 2020 workshop              | May 2020       |
| 34. American Physical Society Meeting                                  | April 2020     |
| 33. UVA, physics department colloquium                                 | November 2019  |
| 32. UT Dallas, physics department colloquium                           | October 2019   |
| 31. Northwestern University, CIERA astrophysics seminar                | May 2019       |
| 30. ETH-ITS Zurich, “New horizons for gravity” workshop                | May 2018       |
| 29. UC San Diego, astrophysics seminar                                 | March 2018     |
| 28. UC Berkeley, 4D particle physics seminar                           | March 2018     |
| 27. Kyoto University, YKIS2018a Symposium                              | February 2018  |
| 26. Oakland University physics seminar                                 | February 2018  |
| 25. University of Wisconsin-Milwaukee gravity seminar                  | January 2018   |

|                                                                                   |                        |
|-----------------------------------------------------------------------------------|------------------------|
| 24. Caltech/JPL Gravitational-Wave (CaJAGWR) seminar                              | January 2018           |
| 23. ICN UNAM, Relativity seminar                                                  | December 2017          |
| 22. University of Mississippi, Astrophysics seminar                               | November 2017          |
| 21. University of Florida, Astrophysics seminar                                   | November 2017          |
| 20. University of Nottingham, Mathematical Physics seminar                        | July 2017              |
| 19. Sapienza University of Rome, New Frontiers in Gravitational-Wave Astrophysics | June 2017              |
| 18. Rochester Institute of Technology, CCRG seminar                               | March 2017             |
| 17. Penn State, IGC seminar                                                       | March 2017             |
| 16. University of Mississippi, Strong Gravity/Binary Dynamics workshop            | February/March 2017    |
| 15. SUNY Stony Brook, “The universe through gravitational waves”                  | December 2016          |
| 14. University of Pennsylvania, New Frontiers in Gravitational Radiation workshop | December 2016          |
| 13. Cambridge MA, Event Horizon Telescope collaboration meeting                   | November/December 2016 |
| 12. Northwestern University CIERA, “Fellows at the Frontiers”                     | August/September 2016  |
| 11. Princeton University, GR@100++ panel discussion                               | April 2016             |
| 10. Cambridge MA, Einstein fellows symposium                                      | October 2014           |
| 9. Perimeter Institute, Strong gravity seminar                                    | October 2014           |
| 8. Cornell University, Friends of astronomy outreach event                        | November 2013          |
| 7. Cambridge MA, Einstein fellows symposium                                       | October 2013           |
| 6. SUNY Geneseo, Physics colloquium                                               | October 2013           |
| 5. University of Maryland, UMD gravity seminar                                    | October 2013           |
| 4. Yale University, YCAA seminar                                                  | September 2013         |
| 3. Kyoto University, YITP long-term workshop                                      | June 2013              |
| 2. Cambridge MA, Einstein fellows symposium                                       | October 2012           |
| 1. Cornell University, Relativity lunch                                           | November 2011          |
